Abstract of JP 2003010560 (A)

PROBLEM TO BE SOLVED: To provide a toy comprising a molded body which is constituted of a thermoplastic elastomer having an excellent flexibility and mechanical strength, and is excellent in coating property and pinning property as well.
SOLUTION: This toy comprises the molded body which is provided of a thermoplastic elastomer composition. In this case, the thermoplastic elastomer composition is constituted of 10 to 75 ph. wt. of an aromatic vinyl based polymer, or a thermoplastic resin the major component of which is the aromatic vinyl based polymer (a), and 25 to 90 ph. wt. of a rubber-form polymer which is partially or totally crosslinked (b).
